PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science Engineering student with a CGPA of 9.5/10 and hands-on experience in IoT, embedded systems, and sensor-based applications. Skilled in Arduino, ESP8266, ESP32, Python, Java, and C programming. Passionate about developing smart automation solutions and applying technology to solve real-world problems.

EDUCATION

B.Tech – Computer Science Engineering
Brahmdevdada Mane Institute of Technology | Third Year
CGPA: **9.5/10**

TECHNICAL SKILLS

Programming: C, Java, Python

IoT & Embedded Systems: Arduino, ESP8266, ESP32, Sensor Interfacing

Sensors: Ultrasonic Sensor, MQ135 Gas Sensor, DHT22 Temperature & Humidity Sensor

Tools: Arduino IDE, GitHub, Microsoft Excel, Microsoft PowerPoint

Soft Skills: Communication, Teamwork, Problem Solving, Presentation Skills

PROJECTS

Smart Vehicle System (Hackathon Winner)

- Developed an IoT-based smart vehicle solution during a college hackathon.

- Secured **First Prize** among participating teams.

Smart Parking System

- Built a parking management system using ESP8266 and ultrasonic sensors.
- Implemented real-time parking slot monitoring and vehicle detection.

AI-Based Air Purification System

- Designed an intelligent air purification concept integrating IoT and AI-based decision-making.
- Focused on environmental monitoring and smart automation.

Temperature & Gas Monitoring System

- Developed a monitoring system using DHT22 and MQ135 sensors.
- Measured temperature, humidity, and air quality in real time.

ACHIEVEMENTS

- 🏆 First Prize Winner – College Hackathon (Smart Vehicle System)
 - Presented Smart Waste Management System at college-level technical events
 - Presented Smart Microplastic Detection System at university-level innovation events
 - Submitted project idea for Smart India Hackathon (SIH)
-
