EDUCATION

Bachelor of Computer Science (B.Sc. CS)
CGPA: 9.5 (3rd Year Student)
BMIT, Solapur
2026- Present

INTRODUCTION

3rd year Computer Science student with strong interest in Web Development, Python programming, and Data Analysis. Passionate about building real-world projects and continuously improving technical and problem-solving skills.

OBJECTIVE

Seeking an entry-level opportunity to apply technical knowledge in software development and data analysis. Interested in contributing to web-based and data-driven projects while gaining industry experience.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java (Basics), C (Basics)
- **Web Development:** HTML, CSS, JavaScript
- **Database:** Firebase (Realtime Database)
- **Data Analysis:** Pandas, Matplotlib
- **Tools:** Git, GitHub, VS Code

PROJECTS

Smart Vehicle Parking System (Web + Firebase)

- Developed a web-based parking system using HTML, CSS, JavaScript
- Integrated Firebase Realtime Database for real-time tracking
- Implemented vehicle entry and exit management system
- Designed responsive and user-friendly interface
- Project demo- <https://smartparking-1803.web.app>
- Git hub- <https://github.com/truptipawar941/smart-parking-system-web>

Data Analysis Project (Python)

- Performed data cleaning and analysis using Pandas
- Created visualizations using Matplotlib
- Extracted insights from dataset
- Identified patterns and trends
- Demo link- <http://10.201.153.213:8501>
- Git hub link- https://github.com/truptipawar941/Data_analysis.git

Snake Game (Python)

- Built a classic Snake Game using Python and Pygame
- Implemented scoring system and game logic
- Used keyboard event handling for controls
- Git hub link- <https://github.com/truptipawar941/snakegame.git>

ACHIEVEMENTS

- Participated in College-Level UI/UX Design Competition
- Built multiple projects in Web Development and Python
- Experience in GitHub project management and version control
